

KEY PRODUCTS

Backpack Sprayers

- Tough & rugged design
- Four stage filtration
- Range of sizes
- Wide range of accessories and add-ons
- Versatile
- Multifunctional

Hand held sprayers

- Professional, high quality sprayers
- Range of sizes
- High quality robust design
- Suitable for many small spraying jobs

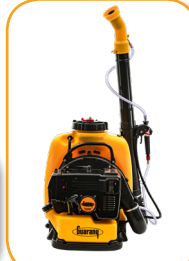

Fire fighting products

- Flexible & solid back-packs
- Suitable for forest fires, heath fires, car fires and chimney fires
- Skid mounted units for use with foam or water

Misters & Nebulisers

- Motorised backpack nebulisers
- Hand held electric foggers
- Distributes liquid, powdered & granulated product

Powder & Granule Applicators

- Manually operated
- Soil injection
- Backpack or hand held versions
- Suitable for all powdered and granulated agrochemicals

Accessories

- Lances
- Soil injectors
- Regulator valves
- Nozzle tips
- Booms
- Flowrate regulators
- Control shields
- Service kits

Welcome to PSP

As our company name would suggest, the Professional Sprayers People (PSP) supply market beating spraying equipment solutions designed primarily for use by professionals such as garden contractors, grounds keepers, farmers, horticulturists and fire fighters.

We have a full range of manual sprayers from simple hand-held spot sprayers to 20 litre backpack sprayers for larger jobs. Our equipment is suitable for a wide variety of jobs including insecticide, herbicide and liquid fertiliser spraying as well as wood treatment, upholstery & carpet cleaning and car valeting. In addition to spraying equipment we also supply dust applicators, granule spreaders and one of the most powerful leaf blowers on the market.

At PSP, we don't just deliver a range of great products. We offer advice and technological support, helping our customers find the right product for their specific needs.

All our products are made by Guarany, which has been manufacturing market-leading professional spraying equipment for more than 90 years.

We pride ourselves on our helpful, friendly customer service, and would love to assist you with any professional spraying problem or requirement you may have.

KEY INDUSTRIES & APPLICATIONS

Horticulture & agriculture

The spraying of herbicides, insecticides and fertilisers is an every day task for professional growers the world over. In commercial green houses, polytunnels and on smaller open-air crop fields, our backpack and compression sprayers, with their unique precision dosing and application features, can offer the efficiencies and performance of high-tech, large-scale spraying systems. A range of accessories also increases functionality making these products extremely versatile.

Grounds Maintenance

Groundskeeping and contracting works are physically demanding, meaning kit needs to be robust and durable as well as ergonomically built to ensure it is comfortable and does not contribute to injuries such as back problems. Our products have been designed with the user firmly in mind and a range of accessories such as telescopic lances ensures physical exertion and strain is minimised wherever possible.

Fire safety

We offer a range of first response fire-fighting equipment specifically designed to help combat the threat of fire in hard to reach areas. Known for its quality and durability, our flexible backpack is a tried and tested bit of kit used by firefighters across the UK for incidents such as brush fires, car fires and chimney fires. The flexible nature of the bag gives the user far greater manoeuvrability than a rigid tank backpack and means it folds away for easy storage.

Forestry

In addition to liquid spraying equipment we offer a range of niche products which are ideal for use in forestry. Our granule application systems enable precise dosing and distribution of pelleted chemicals and dusting systems allow for the delivery of powders. In areas where it is important that excess chemicals or products are not harming the surrounding environment, these tools offer targeted treatment as well as reducing the cost of wasted product.

Home use

Our range of products are also suitable for home use. They are simple to use and, as they are designed for use by professional sprayers, are extremely durable, making them very good value. Their versatility due to the range of accessories available also makes them an attractive option for home use, saving on buying multiple devices and taking up less storage space.

Who are we?

SNP is part of The Spray People Group (SPG) which was founded in 2013 to bring under one umbrella our specialist business units. SPG has more than four decades combined experience of providing spray nozzles and other niche products and solutions to industry.

Our headquarters are in the UK but we work with customers all over the world. As well as distributing market-leading products, our service across all our group companies is underpinned by in-depth technical and application support, ensuring our clients always have the correct solution for their individual needs.
